

Public Advisory

BOIL WATER **NOTICE**

A 14" water main break on Depot Street, Ringgold Georgia is causing water pressure in parts of the water system to drop to dangerously low levels. When this occurs a potential health hazard may exist in these areas of zero pressure from backflow and/or back-siphonage of water of unknown quality into the water distribution system.

In order to protect the public from a potential health hazard, all citizens that have experienced water outages and/or low water pressures are advised to "boil" all water prior to use for drinking, cooking, or preparing baby food. The water should be boiled for at least one minute after reaching a rolling boil. Citizens should continue to boil their water until they are notified by the City of Ringgold water utility that the water system has been restored to full operation, and that the microbiological quality of the water in the distribution system is safe for human consumption.

The water main break on Depot Street is under repair and should be back online soon. Please follow us on Facebook for updates and/or the City website at www.cityofringgoldga.gov. Once we are able to lift the boiled notice we will post it.
